

Explore Your World

Make an interactive project in Octostudio about an animal that interests you.

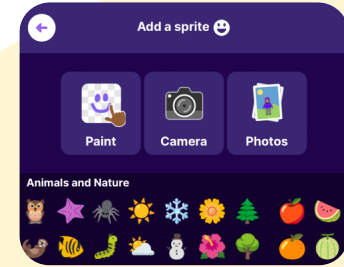

1 Think of an animal

What is an animal that interests you? It could be an insect, bird or any other creature.

2 Add your animal

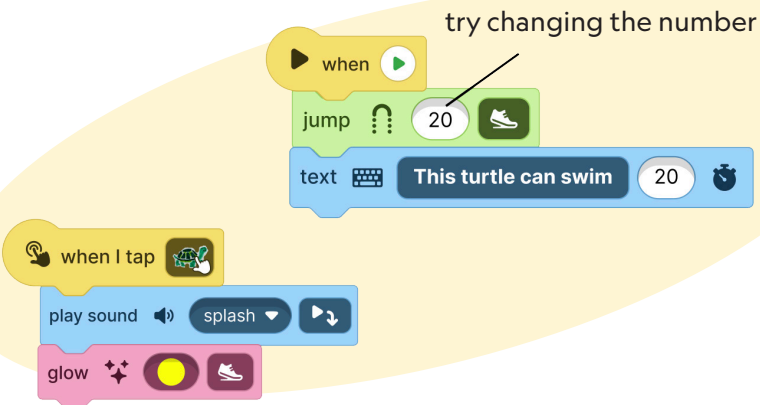

Add your creature as a sprite in OctoStudio.

You can draw, use a photo or choose an emoji.

3 Bring it to life!

What do you want your creature to do? Use coding blocks to add motion, sound and more!

For a photo, trace around the part you want to keep.

4 Add more

Explore and experiment with adding more sprites, sounds and coding blocks.

5 Share

Send your project as a video, gif or OctoStudio file.
